

# The residency in France: realities, problems and future perspectives

11th September 2019

European Congress of Pathology

Loïc Trapani

AFIAP

# Residency in France: what is it?

- 306 residents in formation in 2019
- Actually : 2 different models
- Last reform: Five years : 7 + 3
- New reform: Five years
  - 1st : Base phase
  - 2-4<sup>e</sup> : Deepening phase
  - 5<sup>e</sup> : Consolidation phase -> Junior Doctor
- 9 semesters of pathology including in free internship (pathology or excluding-pathology)
- 1 semester of molecular pathology

# Realities

- Online course platform
- 1 National learning every year organised by the AFIAP
- Master 2 or science thesis
- Internship with other hospital: subspecialization
- Congress organised every year
  - Carrefour pathologie (SFP)
  - Assises (AIP)
  - Others (JHP)

# Residency in France: what is it?

- Validation : memory of DES + thesis of medicine
- Post-residency : many options
  - University hospital assistant (AHU)
  - Specialist assistant (AS)
  - Hospital doctor (PH)
  - Private

# Problems

- Lack of teachers in some cities
- Lack of internship open in the private
- Lack of residents
- Decrease of university places in the public hospital
- Disparities of cities in training and access to new technologies (blade scanner)
- Access to limited search in some cities

# Future perspectives

- Best training with more coaching
- Access to digital training
- Examinations end of phase base and deepening
- Opening of field of internship in private laboratory in ALL cities
- 2 national courses per year organized by AFIAP

AFIAP

Thank you
